

Hands-on Workshop for Ultrasound Guided Injection of Botulinum Toxin in the Treatment of Spasticity

The **Hands-on Workshop for Ultrasound Guided Injection of Botulinum Toxin in the Treatment of Spasticity** is organized by the Academy of Neurosciences, on a regular basis, in the city of Ioannina, Greece. It is an advanced hands-on course, addressed to Neurologists, Orthopaedics and Physiatrists, intending to provide detailed information on the use of Botulinum Toxin for the management of spasticity of upper and lower extremities, hosted in the facilities of University of Ioannina and University Hospital of Ioannina.

The workshop includes an in-depth anatomy review of the appendicular muscles that are usually injected with botulinum toxin. It combines interactive presentations on ultrasound guidance of botulinum toxin injections, with hands-on injection training on models and patients, in small groups up to 6 trainees.

Organizing Committee:

Spyridon Konitsiotis
Professor of Neurology
Department of Neurology
University of Ioannina

Konstantinos Tsamis
Assistant Professor of
Physiology
University of Ioannina

Dimitrios Mytilinaios
Forensic Surgeon and
Anatomist
KenHub Content Manager

Program

1st Day

- 10.30 – 11.00 Registration
- 11.00 – 12.30 Anatomy of the Upper Extremity Muscles & Evaluation of Spasticity on the Upper Extremity Muscles
- 12.30 – 14.00 Application of the Botulinum Toxin on the Spasticity of the Upper Extremity – Hands-on training on models
- 14.00 – 17.00 Light Lunch and Break
- 17.00 – 18.30 Anatomy of the Lower Extremity Muscles & Evaluation of Spasticity on the Lower Extremity Muscles
- 18.30 – 20.00 Application of the Botulinum Toxin on the Spasticity of the Lower Extremity – Hands-on training on models
- 21.00 Dinner

2nd Day

- 09.00 – 11.00 Application of ultrasound-guided botulinum toxin for the treatment of upper and lower limb spasticity – Live patient demonstration
- 11.00 – 11.30 Coffee Break
- 11.30 – 14.30 Application of ultrasound-guided botulinum toxin for the treatment of upper and lower limb spasticity – Live patient demonstration
- 14.30 – 15.00 Closing Session
